Interim Consolidated Financial Statements
(Unaudited)
For the three months ended March 31, 2009

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3 (3) (a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's audit.

iCo Therapeutics Inc.

(a development stage company)

Notes to the Interim Financial Statements

For the three months ended March 31, 2009 (unaudited)

1 Basis of presentation and significant accounting policies

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements and do not contain all of the information that is required for annual financial statements. Accordingly, they should be read in conjunction with the consolidated annual financial statements for the year ended December 31, 2008. When necessary, the financial statements include amounts based on informed estimates and best judgments of management. The results of operations and comprehensive loss for the interim periods reported are not necessarily indicative of results to be expected for the year.

On January 1, 2009, the Company amalgamated with its wholly owned subsidiary, iCology Corporation (“iCology”). iCology was a dormant holding company and the amalgamation was for the purposes of simplifying the Company’s corporate structure and reducing accounting and administrative overhead.

These interim consolidated financial statements follow the same accounting policies and methods of their application as the December 31, 2008 consolidated annual financial statements except as disclosed in note 2.

Certain comparative figures have been reclassified to conform to the current period’s presentation.

2 New Accounting Pronouncements

Section 3064 – Goodwill and Intangible Assets

Effective January 1, 2009 the Company adopted new CICA standards 3064 “Goodwill and Intangible Assets” which established revised standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets. The Company has considered the effect of the new standards and determined that the adoption of the requirements will have no impact on the Company’s financial statements.

International Financial Reporting Standards

In February, 2008 the Canadian Accounting Standards Board confirmed that International Financial Reporting Standards will replace Canada’s current generally accepted accounting principles for publicly accountable profit-oriented enterprises effective January 1, 2011. The Company is presently considering the effect these standards will have on its financial statements.

3 Capital disclosures

The Company’s objectives when managing capital are to safeguard its accumulated capital in order to maintain its ability to continue as a going concern and to advance its research, development and commercialization activities. The capital structure of the Company consists of shareholder’s equity as well as the cash and cash equivalents and tax credit receivable balances.

iCo Therapeutics Inc.

(a development stage company)

Notes to the Interim Financial Statements

For the three months ended March 31, 2009 (unaudited)

The Company manages its capital structure and makes adjustments to it based on economic conditions and the risk characteristics of the underlying assets. The Company, upon approval from its board of directors, will balance its overall capital structure through new share or debt issuances or by undertaking other activities as deemed appropriate under specific circumstances.

The company expects that its current capital resources will be sufficient to support its research and development plans and operations into the fourth quarter of 2009. The company is not subject to externally imposed capital requirements.

4 Financial instruments and financial risk management

Financial instruments

The Company has classified its financial instruments as follows:

Financial Instrument	Classification	Measurement	March 31, 2009 \$
Cash and cash equivalents	Held for trading	Fair value	1,198,788
Other receivables	Loans and receivables	Amortized costs using the effective interest method	18,980
Accounts payable and accrued liabilities	Other financial liabilities	Amortized costs using the effective interest method	285,242

Financial risk management

The Company is exposed to certain financial risks, including credit risk, liquidity risk and market risk.

a) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations and arises principally from the company's cash and cash equivalents and other receivables. The Company invests its excess cash in short term money market instruments such as Guaranteed Investment Certificates. The Company has established guidelines relative to diversification, credit ratings and maturities that maintain safety and liquidity. These guidelines are periodically reviewed by the Company's audit committee and modified to reflect changes in market conditions.

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. To the extent that the Company does not believe it has sufficient liquidity to meet its current obligations, the board of directors considers securing additional funds through equity, debt or partnering

Notes to the Interim Financial Statements

For the three months ended March 31, 2009 (unaudited)

transactions. The board of directors approves the company's annual operation and capital budgets as well as any material transactions outside the ordinary course of business.

c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or valuation of its financial instruments.

The company is exposed to financial risk related to fluctuation of foreign exchange rates. Foreign currency risk is limited to the portion of the Company's business transactions denominated in currencies other than the Canadian dollar, primarily expenses for research and development incurred in US dollars ("USD"). The Company believes that the results of operations, financial position and cash flows would be affected by a sudden change in foreign exchange rates, but would not impair or enhance its ability to pay its USD. The Company manages foreign exchange risk by maintaining USD cash on hand to fund its short term USD expenditures. As at March 31, 2009 USD denominated cash totalled USD \$42,134. The only accounts payable and accrued liabilities exposure is in USD and that total is \$168,470.

The company is subject to interest rate risk on its cash and cash equivalents and believes that the results of operations, financial position and cash flows would not be significantly affected by a sudden change in market interest rates relative to the investment interest rates due to the short term nature of the investments. As at March 31, 2009, cash held in the Canadian dollar savings account of \$719,387 currently bears interest at a rate up to 0.25%.

- a) At February 9, 2009, the company completed a private placement for gross proceeds of \$1,292,500 through the issuance of 6,462,500 units at a price of \$0.20 per unit. Each unit comprised one common share and one-half of one common share purchase warrant. Each warrant is exercisable at \$0.30 for a period of 12 months. Of the gross proceeds, \$298,269 was attributable to warrants. In addition, issuance costs of \$52,512 were incurred of which \$40,435 was allocated to share capital and \$12,077 was allocated to warrants. The assumptions used to estimate the fair value of warrants issued were: dividend yield 0%; volatility 195%; expected life 12 months; and risk-free interest rate 0.82%.

Stock options

On December 31, 2007 as part of the Arrangement, the Company adopted a new stock option plan (the “2007 Option Plan”) dated December 31, 2007 (the “Effective Date”) whereby up to 2,686,977 common shares representing 15% of the issued and outstanding common shares as at the Effective Date are reserved for issuance pursuant to the exercise of stock options. Under the 2007 Option Plan, options have a maximum 5 year term and are subject to certain vesting requirements. The Beanstalk options were transferred in on a one for one basis. They are fully vested and expire on December 1, 2011.

	Number of stock options outstanding	Weighted average exercise price \$
